

Pharmacovigilance Manager

**Dermal Laboratories - Gosmore
Full Time**

This is an exciting new vacancy for a Pharmacovigilance Manager to lead our small, friendly team reporting to the Head of Regulatory & Clinical Affairs. The key responsibility of the role is to provide technical and operational expertise to implement the group's central pharmacovigilance (PVG) functions according to evolving legal and regulatory requirements for medicines, medical devices and cosmetics.

This will include developing and supporting the PVG team in case processing, literature searching, signal management, adverse event reporting and post market surveillance. It will involve managing the customer product complaints interface and escalating issues for resolution by the Product Quality team.

It will also involve working closely with clinical research for study related ADR management and SUSAR reporting and ensuring effective integration of PVG in all areas of the business.

The role includes overall responsibility for the PVG data management system, for maintaining the Pharmacovigilance System Master File and for deputising for the Qualified Person responsible for PVG.

The ideal candidate will be an expert in pharmacovigilance for medicines and medical devices, have a life science or pharmacy degree, previous management experience, excellent analytical, problem-solving and organisational skills and be process orientated.
